

# Kiosk for CareerBuilder Employment Screening

Fast and secure candidate screening on the spot

## On-Site Screening No One Else Offers

Sixty-eight percent of candidates continue to look for other jobs during the screening process. Kiosk cuts down the time it takes to screen candidates, thereby enabling companies to onboard candidates faster.

Kiosk, a key feature in CareerBuilder Employment Screening's WebACE™ platform, makes it easier for employers to get the information necessary to complete background checks – and easier for candidates to provide it.

With Kiosk, candidates can easily log on to a secure online portal from any company device and, in less than five minutes, enter the necessary information to conduct background screenings. Using Kiosk removes any need for filling out paper forms and eliminates the risk of personal information being exposed.

No other vendor enables candidates to complete the background check process on site via a secured portal. Not only does Kiosk reduce paperwork for both candidates and clients, it mitigates compliance risk as well.

## FEATURES

### A Better Candidate Experience

Kiosk is fast, easy and convenient for candidates, particularly those who do not have immediate access to the internet.

### Faster Turnaround

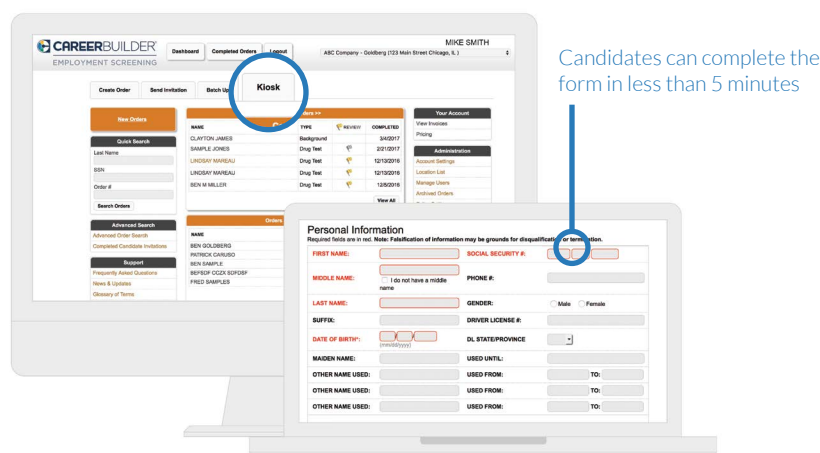

With Kiosk, employers no longer need to wait for candidates to submit their registrations later off-site or via email.

### Eliminates Errors

Candidates enter their information digitally, eliminating the likelihood of data entry errors from difficult-to-read handwriting.

### Security Guaranteed

CareerBuilder Employment Screening's WebACE™ secure online portal mitigates compliance risk for employers, and candidates can be assured their information is safe.
